SEED Partner's Multi-Site Solar

SEED Partners, LLC, LINC's mission-driven energy and water services company, is kicking off an industry first **multi-site solar development** project. We're installing new solar photovoltaic systems at five LINC properties and aggregating them as one project to leverage tax credits and available incentive programs as part of a new financing structure. This project increases portfolio performance by leveraging green retrofits and reducing operating costs, reduces resident energy costs, and includes a solar job training component. The project will be co-developed by SEED and National Housing Trust Renewable, with grant support from Enterprise Community Partners.
